PDF to docx Converter

Step-1:

Install Python IDLE (3.13 64-bit) in your computer/Laptop.

Step-2:

Open command prompt and enter the command:

pip install pdf2docx

This command helps us to convert the pdf file into document.

Step-3:

Now Open the Python IDLE(3.13 64-bit) and type the code given.

Save the file.

Step-4:

Run the code.

The input format: Path of the file\filename.pdf

Ex: C:\Users\user\Documents\HomeWork.pdf

After typing Click on ENTER.

Step-5:

The file will be saved in the same path with the .docx (Document) extension.

THANK YOU
